

Wired-or connection of 2 or more light barriers:

Devices LBx-100-S/E:

If the light beam of one or more of the connected receivers is free (light beam not interrupted), then the output is "H" +24VDC.

If the light beams of all of the connected receivers are interrupted, then the output is "L" 0V.

Devices LBx-100-S/E S179:

If the light beam of one or more of the connected receivers is interrupted, then the output is "H" +24VDC.

If the light beams of all of the connected receivers are free (not interrupted), then the output is "L" 0V.
